

Exaquantum TRAINING COURSE

Advanced Configuration Engineers

Course Objectives

This course will advance the skills covered on the Configuration Engineering Course to include configuration of Exaquantum to access data from Third Party OPC Classic and UA Servers, complex scripting in calculation tags, Role Based Names spaces (RBNS) and other configuration topics.

Prerequisite Knowledge

This course will assume that all attendees have already taken the Exaquantum Configuration Engineers Course (NPP908).

Who Should Attend

This course is designed for anyone requiring the skills to perform advanced configuration of an Exaquantum System.

Key Topics

- Configuration of Exaquantum to access data from Third Party OPC Classic and UA Servers
- Configuring complex calculation Tag Scripts
- Configuring Exaquantum Event Handlers
- Configuring RBNS and multi-server considerations
- Importing/exporting data to/from Exaquantum
- Advanced Tag Maintenance

Duration: 3 Days
