ONLINE TRAINING

Installation Engineers

ONLINE TRAINING COURSE

Course Objectives

All steps required to install Exaquantum on a Data Server, Web Server, Combined Server and Clients. Exaquantum Access Security is also covered in some detail. The course will follow a much less formal, more workshop-based approach.

Prerequisite Knowledge

A very good working knowledge of Microsoft Windows administration is required. This knowledge could be gained by attendance of Microsoft Accelerated Administration and Core Technologies course or equivalent. It is also recommended that the Exaquantum Product Overview Course (NTPP900) has also been taken prior to attendance on this course.

Who Should Attend

This course is designed for anyone requiring the skills to install Exaquantum.

Program

- Hardware and Software requirements
- Installing Exaquantum software and system prerequisite software
- Post installation tasks
- Understanding the Exaquantum Access Security and the IT Security tool
- Available troubleshooting techniques

Duration: 18 Hours
