

ONLINE TRAINING

Exaquantum Version Upgrade

ONLINE TRAINING COURSE

Course Objectives

This course will include reference to all the new and changed features of the Admin, System and Client tools and together with changes in product functionality. This will be based on the Release Notes for the latest version of Exaquantum. Changes to prerequisite third party software and supported Microsoft Windows platforms will also be covered.

Prerequisite Knowledge

A knowledge of Exaquantum at some previous releases will be assumed. The course covers all the job roles, so a broad cross section of knowledge of an earlier release will be necessary to get full advantage of all the material covered in this course.

Who Should Attend

This course is designed for those people who need to be able to upgrade an already existing system. It will also be useful to those people who wish to know what features are included in the latest release.

Program

- New hardware, operating system and third party software support
- Upgrading to the latest Exaquantum release
- Changes to the administration tools
- Changes to the client tools
- Changes to the support tools

Duration: 12 Hours
