

ONLINE TRAINING

Installation

ONLINE TRAINING COURSE

Course Objectives

This course is designed to instruct an engineer to install Exaquantum/Batch software on a system where Exaquantum is already installed. It provides information about installing Exaquantum Data and Web Server, Exaquantum/Batch Server and Exaopc Batch. It then covers the necessary configuration tasks to enable it to gather information from a CENTUM CS3000 or CENTUM VP Batch engineering station in order to acquire the recipes and other specific batch data. Securing the Exaquantum/Batch installation is also discussed.

Prerequisite Knowledge

Students should have taken the 2 day Exaquantum/Batch Batch/Web Users Course prior to attending this course. It is also recommended that the Exaquantum Installation Engineers Course (NTPP907) be attended prior to attending this course.

Who Should Attend

This course is designed for those users who will be required to install Exaquantum/Batch systems.

Program

- Introduction and overview
- Deployment option and Control System requirements
- Installing Exaquantum/Batch
- Exaquantum/Batch security
- Updating to the latest release

Duration: 12 Hours
