YOKOGAWA

ONLINE TRAINING

Report Designers

ONLINE TRAINING COURSE

Course Objectives

This course is designed to teach engineers, IT professionals and production supervisors how to create custom reports. It provides basic background in the use of Microsoft Query, Visual Basic for Applications and Excel. However, the main focus of the course is on using these tools inside the Report Template Manager to create, test, release for use and schedule Exaquantum/Batch reports. Also covered is the Exaquantum/Batch database structure and the use of database views and tables.

Prerequisite Knowledge

The NTPB900 Exaquantum/Batch BatchWeb Users Course is a prerequisite for this course. Previous knowledge of Microsoft Excel would be a distinct advantage to those attending this course.

Who Should Attend

Anyone who needs to create or manage Exaquantum/Batch Report Templates.

Program

- Introduction and overview
- Report Template Manager
- Microsoft Excel and Microsoft Query overview
- Exaquantum/Batch Excel add-in and Formula Selection View Manager
- Modifying standard reports
- Exaquantum/Batch database structure
- Creating custom reports
- Advanced reporting

Duration: 12 Hours
