ONLINE TRAINING

System Administrators

ONLINE TRAINING COURSE

Course Objectives

This course covers all the tasks necessary to administer an Exaquantum/Batch System using Automatic Batch Data Collection. The aim of the course is to demonstrate the post installation configuration of an Exaquantum/Batch System and to perform all necessary steps to get the system up and running etc. Batch User Security and Archiving is also covered on this course. Assigning tags to Equipment will also be covered.

Prerequisite Knowledge

Students should have already taken the Exaquantum/Batch BatchWeb Users Course (NTPB900). It would also be an advantage to have attended the Exaquantum Administrators Course (NTPP906).

Who Should Attend

This course is essential for those people responsible for the Administration of an Exaquantum/Batch System. At least two people in an organization with an Exaquantum/Batch system should attend this course. It is not designed for those people who just need a general overview of server functionality.

Program

- Configuring Automatic Batch Data Collection
- Configuring Exaquantum Tags for Batch Trends
- Scheduling Reports
- Batch Data Security and Archiving
- Troubleshooting Techniques

Duration: 12 Hours
