# Alarm Master Database

ONLINE TRAINING COURSE

## Course Objectives

Exaquantum/AMD provides a centralized Alarm Master Database, holding the alarm configurations of connected process plants. It provides the ability to configure and maintain the alarm configuration details for multiple DCS and CAMS systems. Exaquantum/AMD strives to adhere to the principles as laid out in the EEMUA 191 and ISA 18.2 guidelines.

### Prerequisite Knowledge

It will be assumed that attendees are familiar with Microsoft Windows and the basic Microsoft Windows terminology. It also assumes that you are familiar with major features of Exaquantum. Knowledge of SQL Server Management Studio is essential.

### Who Should Attend

This course is designed for those users who wish to get more familiar with the Exaquantum Alarm Master Database product.

### Program

The course consists of the following topics:

- Installation Requirements and Prerequisites
- Installation
- Post Installation Configuration
- Exaquantum/AMD Agents
- Security
- Exaquantum/AMD Web User Interface
- Alarms and Configuration
- Documents and Reports
- Import and Export
- Enforcements
- Troubleshooting

**Duration: 18 Hours**
