Can I write new data into or modify existing data in the Batch Database?

Manual Addition or modification of existing data directly into the database may affect the normal operation of the system and is not supported in normal circumstances.

In most circumstances, modification could be a breach of the SQL Server license shipped with Exaquantum/Batch.

If there is a problem with data acquisition or storage then this should be reported to a Yokogawa Affiliate for investigation.

Exaquantum /Batch Releases Affected
