

## Has Exaquantum/Batch a Batch Scheduling capability?

Exaquantum/Batch is designed as a batch reporting system not a control or regulatory system.

It therefore has no built in Batch Scheduling capability.

Exaquantum/MDX (Manufacturing Data eXchange) is a separately available product which can be configured on a project by project basis to provide these capabilities.

Go to <http://www.ymx.yokogawa.com/support/eu-supdoc.htm> and scroll down to see more details of the MDX product.
