Chapter 1 Introduction

The default number of Tags/Pens that can be displayed on a Trend is set at 8 for performance reasons.

Although it is possible to add more Tags/Pens to a trend within Exaquantum/Explorer and/or ExaquantumWeb Trends, the performance may be affected and should be monitored.

It may be the case that the number of Tags/Pens need to be set to a value that is acceptable to the end user, which results in the required performance.

This document details the steps that are required to show more than 8 Tags/Pens.

1.1 Audience

This guide is intended for system integrators, administrators and users.

Chapter 2 Adding More Than 8 Tags/Pens

If more than the 8 Default Tags/Pens are required to be added to a Exaquantum Explorer Trend or Exaquantum Web Trend, then the following the methods described in this Chapter will allow this to be implemented.

2.1 Adding Additional Tags/Pens within Exaquantum/Explorer

When using Exaquantum Explorer Trends with default installation settings it is only possible to add a maximum of 8 Tags/Pens. This can be increased by following the procedure below.

2.1.1 Exaquantum Explorer – TrendComparison Properties – Trend Data Setting

The Trending Control Properties window is opened by right-clicking on the Trending Control and selecting Properties from the pop-up menu.

Max Tags

This field displays the maximum number of Tags/Pens that can be contained in the Trending control.

Use the up/down arrows shown on the Trend Comparison Properties/Trend Data Setting Tab/Advanced Data screen to change the number of Max Tags.

Max, Tags:	0	
Haxi Tagai	0	•

Note: The default values are recommended for optimum performance.

When using Exaquantum Explorer it is possible to add more than 8 Tags/Pens, but the performance and readability may be affected.

If there is a requirement to have more than 8 Tags/Pens, it is suggested that the trends be monitored for no ill effects and to check the Event Log for any related messages.

2.2 Adding Additional Tags/Pens within ExaquantumWeb Trends

When using Exaquantum Web Trends with its default installation settings it is only possible to add a maximum of 8 Tags/Pens, although this can be increased by referring to the information below.

No	Parameter	Type/Section	Default	Description
5	TrendMaximumTagSelection	applicationSettings	8	The maximum number of Tags that can be added to a Trend
42	XYPlotMaximumTagSelection	applicationSettings	8	The maximum number of Tags that can be added to an XY-Plot

Referencing the Following Parameters Within The Exaquantum Config file detailed below.

Changing the relevant parameter will increase the maximum number of Tags/Pens shown.

The web.config file can be modified using Notepad to increase the number of Tags/Pens.

The Exaquantum website's configuration file is located at the following location: *"<WebSiteInstallDirectory>\ExaquantumWeb*web.config"

In the example shown below the number of Tags/Pens has been modified from 8 to 10

<setting name="TrendMaximumTagSelection" serializeAs="String">

<value>10</value>

</setting>

When any changes are made to the **web.config** file, then Microsoft IIS will need to be Reset

Use the command iisreset from a command prompt when run as an administrator.

Note: The default values are recommended for optimum performance.

When using Exaquantum Explorer it is possible to add more than 8 Tags/Pens, but the performance and combined visibility of the trends on screen may be affected.

If there is a requirement to have more than 8 Tags/Pens, it is suggested that the trend performance be monitored and also check the Event Log for any related messages.
