# Chapter 1 Introduction

When installing the Exaquantum\ARA R3.30 software on a server with the operating system Microsoft Windows 2012 or Microsoft Windows 2012 R2, the install will fail and rollback.

This is due to ARA R3.30 requiring a newer version of Powershell than the one shipped with Microsoft Windows 2012

This document will detail how to resolve the error encountered.

## 1.1 Audience

This guide is intended for system integrators and administrators.

## Chapter 2 Issue Description

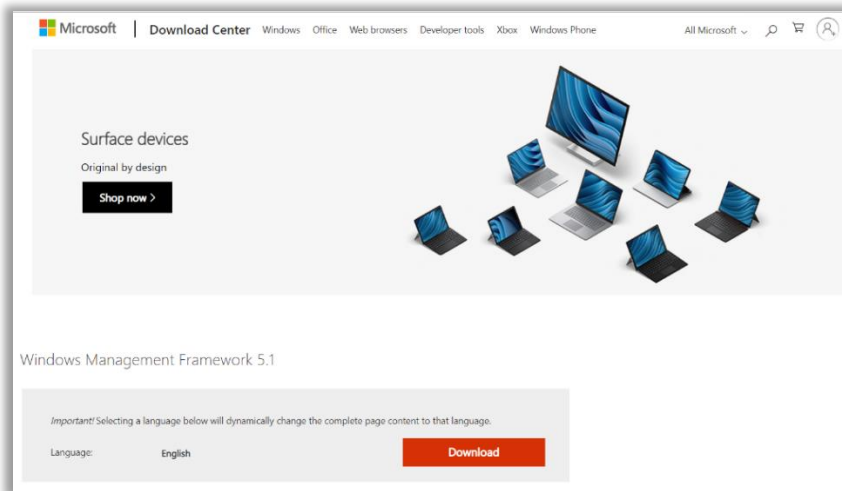

When installing the ARA product, PowerShell version 5 is a minimum requirement. Windows Server 2012 includes PowerShell version 4 and requires updating to successfully install.

## Chapter 3 Issue Resolution

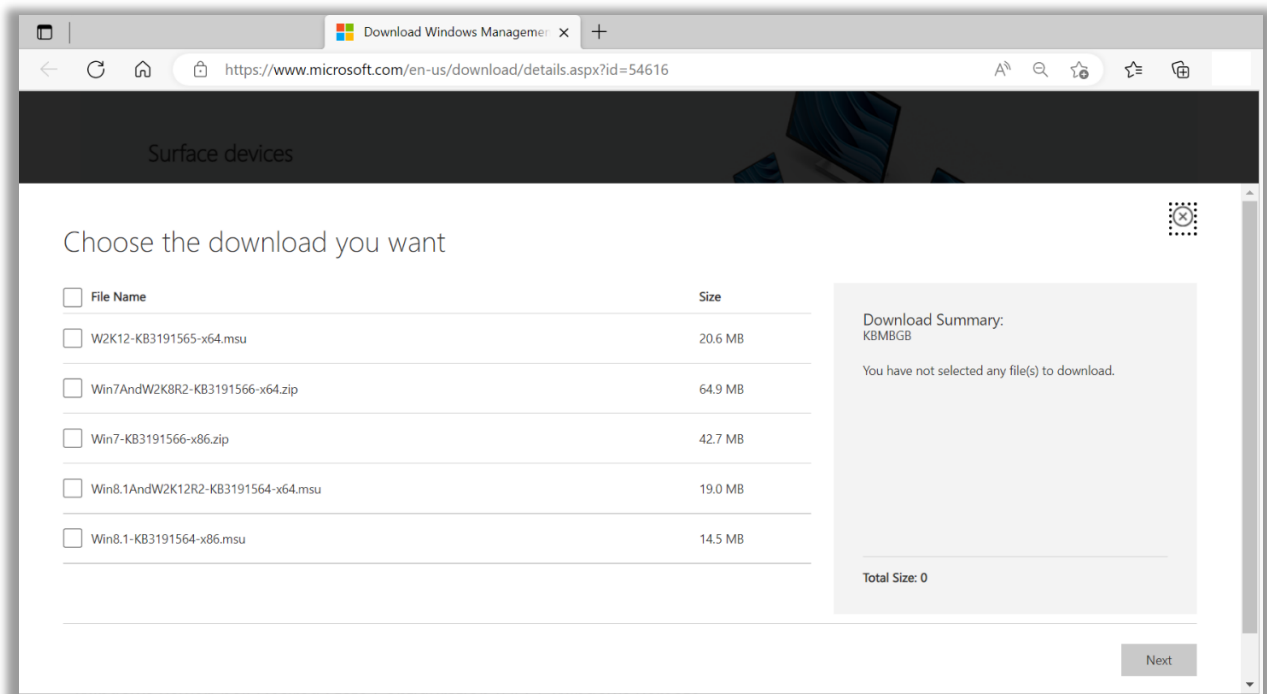

To resolve the issue, the latest version of Windows Management Framework can be installed to update the version of Powershell.

The Microsoft installer can be downloaded from the below website:

<https://www.microsoft.com/en-us/download/details.aspx?id=54616>

1. Go to the download section (by selecting the Download button).
2. Select the download required for the operating system in use.

3. Install the required update on the Exaquantum/ARA R3.30 server.
4. Retry the installation of Exaquantum/ARA.

---

## Chapter 4 Further Reading

There is additional information regarding this Microsoft update on the website under the Details section:
